Playback support demo

Caller script | Fictional role-play

What you're testing

You're role-playing a church volunteer getting an iPad ready. Playback says the church's subscription expired, even though it has been paid for.

Penny may suggest **Restore Purchases** first or check whether Playback needs an **update**. Let her lead. If anything is unclear, ask, **"How do I navigate to that area?"**

Caller script

1. **Start:** "Hi, I'm trying to get our church's iPad ready, but Playback says our subscription expired. I thought we already paid for it."
2. Answer her questions using the information below. Ask for help finding unfamiliar settings.
3. **After she guides the update:** "Okay, it's finished. I've opened Playback again, and that message is gone."
4. **When she asks whether you need anything else:** "Actually, we're hoping to use Way Maker on Sunday. Do we already have that one?"
5. **After she answers:** "Okay, I'll let our worship leader know. That's everything, thank you!"

Optional information - share only when asked

Name: John Doe

Church: Riverbend Community Church

Organization ID: 480113 (your admin sent you this number)

Payment: MultiTracks website

Restore Purchases result: Still says expired (only after Penny guides you through it)

Playback version: 8.6.1 (ask for help finding it)

iPadOS version: 18 (ask for help finding it)

iPad model: iPad Air, fifth generation

Selected organization: Riverbend Community Church (after Penny helps you check)

Fictional role-play: report success only after Penny guides the relevant action.
